September 1, 2009

Dear Parents and Guardians,

On the occasion of our first day of school in Seekonk, it is my genuine pleasure to extend my best wishes to you and your children for a successful, fulfilling, and enjoyable school year.

I am delighted to be joining the Seekonk School District as the new Superintendent of Schools. My background experience includes 28 years in public education in New Jersey at which time I was a teacher, principal, director of technology, director of curriculum, instruction and evaluation, and assistant superintendent. In the relatively short time that I have been here I have met many wonderful District staff, parents, and community members who are dedicated to creating a nurturing and supportive educational program and environment for students. I intend to be an extremely active participant in that process.

My plan is to visit school sites, District events, and connect with community organizations on a regular basis in order to better acquaint myself with staff, students, parents and other community members. By attending the many venues I will be providing you with the opportunity to become better acquainted with me. Please do introduce yourself should the occasion arise. I am looking forward to having the chance to meet and greet you.

As the new school year debuts, I am excited about the many fine programs and activities taking place in the District as well as challenges, that all districts face. My vision for the District is one of teamwork and collaboration – working together to recognize and promote our positive achievements and to make improvements as needed in order to ensure success for all students.

Parent involvement is critical to an effective educational program. It is a major component of success for our students. Please help us build a close bridge between home and school; one that will assure that our children learn, grow and flourish as students.

It is my hope that each of your children had an enjoyable first day of school. The excitement, anticipation and enjoyment of the day is unparalleled and never diminishes. We are committed to insuring that your child has a positive school experience.

Sincerely,

Mrs. Madeline P. Meyer  
Superintendent of School
